### ANALYSIS

- Aimmune Therapeutics announced the enrolment of the first patients in phase III, PALISADE, trial for its Oral Immuno-Therapy product candidate indicated in peanut allergy patients. The results are expected in H2 2017, i.e. within the same timeframe as DBV's PEPITE phase III trial. While some might have doubts that DBV would potentially launch its product months behind Aimmune Therapeutics, we can now confirm with a certain level of confidence that the two products should reach the market at the same time upon development success.
- Although primary endpoints of both trials are at 52 weeks, we would highlight that Aimmune Therapeutics' trial carries more risks in our view. Indeed, while the cumulative reacting dose in the phase IIb trial was 443mg of peanut protein, it has been reached at 1043mg for the phase III. Moreover, we would highlight AIMT has only proven sustainability of the response through 22 weeks so far and that the number of adverse events has been higher than in DBV's phase IIb trial.
- Within the food allergy area, we would favour DBV. Remember that applications out of the allergy field (vaccine, CD..) could offer free upside should the trial be initiated.

### VALUATION

- We reiterate our BUY rating and EUR93 fair value.

### NEXT CATALYSTS

- Q1 2016: CoFAR6 study results (mechanistic, biomarkers). NIH-sponsored trial
- March 4<sup>th</sup>-7<sup>th</sup>: American Academy of Allergy, Asthma and Immunology (AAAAI)

# Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

## Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements including a SWOT analysis, positive momentum, technical aspects and the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
NEUTRAL	Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
SELL	Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements including a SWOT analysis, positive momentum, technical aspects and the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
