ANALYSIS

- **Yesterday after market closure, Soitec announced that the group is launching volume production of RF-SOI wafers of a diameter of 300mm.** RF-SOI is used to producing the Front-End module for smartphones, namely the chips responsible for transforming radio signals in digital data (3G/4G/Wifi...). As a result, virtually all smartphones uses RF-SOI substrate for their RF modules today and Soitec is one of the three wafer manufacturer capable of producing RF-SOI with SEH (shareholder of Soitec) and SunEdison currently evaluating a strategic review following receipt of unsolicited preliminary indications of interest from an external investor.
- **This new production line will allow the group to expand its RF-SOI capacities at no costs (zero capex).** We believe that the group current capacities are close to 800k wafers per year (after yielding adjustment). In our view, the ecosystem is ready to start the production of IC on 300mm RF-SOI and the ramp up should come over 2016 as we previously expected (we are making no change in our estimates). Main customers should remain identical to 200mm wafers, i.e. foundries of largest wireless specialised fabless such as Qorvo and Skyworks. We estimate that the current price of 200mm RF-SOI wafer is close to USD 250 per unit and 300mm should be around USD 550, meaning that the group should not benefit from a larger size to improve price per mm² of the wafers since this is basically the same technology. In addition, we believe that the group will not have to invest in new tools to ramp up this production since Soitec can use PD-SOI unused tools to produce these new 300mm RF-SOI wafers.

VALUATION

- Soitec shares trade at a FY17e EV/Sales ratio of 0.7x.

NEXT CATALYSTS

- During April: Q4 2016e sales.

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
NEUTRAL	Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
SELL	Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
