FY 15 results are in line with the consensus' expectations, but above ours. But more importantly, the financial guidance regarding Darzalex (daratumumab) is very encouraging as 1/ Darzalex royalties of DKK200-250m based on an estimated USD250-300m of sales in 2016 (vs BG: USD75m and Bloomberg consensus: USD115m); and 2/ the company is anticipating DKK400m of milestones payments, and we understand this figure assumes positive results from the POLLUX and CASTOR studies). Besides, the recent fall in the stock price has opened a window of opportunity as 1/ current levels are even below those we have seen before daratumumab's first approval; 2/ based upon our SOTP valuation, the street nearly gives no value to daratumumab as a first and second-line treatment for patients with multiple myeloma (these account for about DKK500 of our FV). BUY reiterated with a FV of DKK1,170.

ANALYSIS

- **The non-adjusted net income stood at DKK763.6m** (BG: DKK364m and consensus: DKK741.2m), which is in line with the consensus expectations, but above ours... knowing that we only had DKK340m of milestones payments associated with daratumumab (vs DKK587m being actually received). Cash & cash equivalents stood at DKK3,493m at the end of the year, which is also a bit above with the previous guidance (DKK3,000-3,100m, BG: DKK3,066m).
- **Importantly, the financial guidance for FY16 exceed our hopes when it comes to Darzalex (daratumumab)**, we understand the company is anticipating 1/ DKK400m of milestones payments (and we understand this figure assumes positive results from the POLLUX and CASTOR studies); 2/ DKK200-250m of royalties based on an estimated USD250-300m of sales in 2016 (vs BG: USD75m, Bloomberg consensus: USD115m). Remember that the compound is approved for highly refractory patients for whom there is currently no decent alternatives. Plus, YTD prescriptions are apparently pointing out a strong uptake, and we cannot rule out its off-label use... As this looks quite realistic to our eyes, **we have increased our top line estimates for the first two years of commercialization** (while maintaining our EUR5.5bn peak sales) to EUR219m and EUR443m (vs EUR75m and EUR240m previously).
- More globally speaking the company notably expects 1/ its revenues to be in the DKK825-875m range (vs BG: DKK685m previously), while 2/ its operating income would be around DKK25-75m (vs BG: DKK8m previously). Importantly, while the top line should decrease, we think the "quality" of the revenues are improving as 1/ there are less non-cash items (notably deferred revenues), 2/ royalties and milestones payments from darzalex are becoming the major drivers. Apart from that, OPEX should strongly increase as more and more early-stage projects are advancing.

(in DKKm)	Previous guidance	Actual 2015 result	2016 guidance
Revenue	1,025-1,100	1,133	825-875
Operating expenses	550-600	579	775-825
Reversal of GSK liability	175	176	0
Operating income	625-700	730	25-75
Cash position at end of year	3,000-3,100	3,493	3,300-3,400

VALUATION

- **BUY rating reiterated with a FV of DKK1,170.**
- To our eyes, the recent fall in the stock price has opened a window of opportunity as 1/ current levels are even below those we have seen before daratumumab's first approval; 2/ **based upon our SOTP valuation, the street gives nearly no value to daratumumab as a first and second-line treatment for patients with multiple myeloma** (these accounting for roughly DKK500 of our FV). In other words, the risk-reward profile is very attractive and should allow us to play serenely the upcoming publication of Phase III results.

NEXT CATALYSTS

- Q2 16: Phase III results for daratumumab (anti-CD38) for the treatment of MM patients who received ≥ 1 prior line of therapy.
- Q2 16 or Q3 16: Read-across from the approval of Roche's ocrelizumab (anti-CD20) in multiple sclerosis.
- 2016: collaboration agreement between JNJ and another big pharma to evaluate daratumumab in combination with a PD-1/PD-L1 checkpoint blocker.

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
NEUTRAL	Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
SELL	Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.

Distribution of stock ratings

BUY ratings 63.4%

NEUTRAL ratings 28.4%

SELL ratings 8.2%

Research Disclosure Legend

1	Bryan Garnier shareholding in Issuer	Bryan Garnier & Co Limited or another company in its group (together, the "Bryan Garnier Group") has a shareholding that, individually or combined, exceeds 5% of the paid up and issued share capital of a company that is the subject of this Report (the "Issuer").
