LafargeHolcim has reported its first full-year figures since the merger. 2015 revenues totalled CH29,483m down 6.2% (+0.1% I-f-I), 2% below our estimate and 3% above the consensus while EBITDA came in at CHF5,751m, in line with our estimates and 7% above the consensus. EBITDA margin stood at 19.5%, down 90bps but we expected 19% and IBES 18.8%. CHF1.50 dividend proposed. CHF3.5bn divestment programme underway with one third secured. However, Q4 included a massive CHF3bn in impairment charges. 2018 target confirmed. Analysts' meeting at 9am.

2015 was a difficult year. Adjusted EBITDA fell 4.6% on a like-for-like basis, impacted by difficult markets like Brazil, China, Indonesia or Nigeria. But the group is very well diversified and the top line was flat (+0.1% like-for-like) thanks to positive developments in the US, Mexico and the Philippines. Moreover, 2015 adjusted EBITDA was bang in line with line with our expectations, and looks better than the consensus (although it might not be fully comparable, as LH reports two different EBITDA).

2015 targets were apparently exceeded (CHF200 less capex at CHF1.6; CHF17.3 net debt vs 17.5). The divestment programme is well underway with one third of the CHF3.5bn already secured. However, Q4 net result was massively impacted by a negative CHF3bn in asset impairment and other charges (equivalent to CHF5 per share), which explains the net loss of CHF2.86bn in Q4.

Regarding 2016, LH expects market growth of between 2% and 4% and EM "will continue to grow overall". More than CHF450m in synergies are expected at the EBITDA level in 2016, vs CHF338 in our model but in line with initial guidance.

ANALYSIS

- As far as we are concerned, the CHF3bn in impairment charges was not expected and is obviously not good news. However, adjusted EBITDA was in line with our expectations and is likely to be better than the consensus. This reflects LH's very good diversification.
- Additionally, 2018 targets are confirmed and comments on 2016 market trends do not reflect any sort of market deterioration, on the contrary. Our volume forecasts stand at 2% on average between 2016 and 2018, at the low-end of the range provided for by the markets where LH is located. In all, we think this is reassuring and excludes a worse case scenario for LH.

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
NEUTRAL	Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
SELL	Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
