A strong start to the year for APRR, with 6.8% revenue growth thanks to an impressive 6.5% traffic increase, mostly driven by light vehicles and notably explained by favourable calendar effects. Of course, these effects will not impact the rest of 2016. Still, despite being more optimistic than Eiffage and Vinci with a 2.5% traffic growth assumption this year, we find it very difficult to be more conservative after such a good performance and are making no change to our estimates. The share price is likely to react positively today. FV slightly adjusted to EUR73 (vs EUR71) following SOTP update.

As expected, APRR Q1 traffic benefited from a favourable calendar effect, 2016 being a leap year and the Easter Weekend falling in March this year versus April last year. Some school holidays were favourably scheduled too. Cars were the most impacted.

Despite these calendar effects, the traffic trend in Q1 was nevertheless impressive, with 6.5% volume growth. Light vehicle traffic performed particularly well with 7.1% growth, while heavy vehicles traffic rose 3.9%. Obviously the Easter effect should be neutralised in Q2.

Sales rose 6.8% to EUR541m, thanks in particular to a positive tariff effect (from 1.23% to 1.27% for light vehicles as from 1st February).

ANALYSIS

- This is of course positive for the share price, although the good start to the year should not be a surprise for investors. Again, we would underline that the acceleration was mostly due to cars, while traffic growth for trucks was actually lower in Q1 2016 than in Q4 2015. We would have preferred strong HV trends compare with LV, as if trucks weight 15% of the total traffic, they represent 33% of revenues of APRR.
- Anyway, with such a good start, it looks pretty difficult to us to lower our traffic assumptions of 2.5% for 2016, despite being above Eiffage and Vinci expectations, we understood.
- Note that APRR is a key asset for Eiffage. It represents 16% of sales but 67% of EBIT (but roughly half on a group share basis).

VALUATION

- EUR73 (vs EUR71) Fair Value derived from an SOTP, roughly half of it stems from APRR. We have adjusted our SOTP with an updated book value from new projects, notably the High Speed Line PPP in Brittany (Bretagne-Pays de la Loire) and the Grande Arche refurbishment at la Défense.

NEXT CATALYSTS

- Eiffage Q1 revenues on 9th May 2016

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
NEUTRAL	Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
SELL	Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
