#### ViiV likely to impact GSK beyond dolutegravir (full report released today)

#### Fair Value 1740p vs. 1700p (+20%)

BUY

Since we upgraded GSK to BUY in January, it has been the best performer in the large-cap pharmaceutical segment because its "self-help" profile fits well with what investors need in a more challenging environment. Now what is required for it to go further up is sustainability and visibility over this growth. We are starting with ViiV Healthcare here, which is one of the main drivers. A closer look into this has resulted in a FV upgrade to GBp1,740.

#### ANALYSIS

- Not so long ago, GSK was close to exiting the HIV space after several failures and, even quite
  recently, some were asking the group to spin-off the joint-venture and sell part of its stake in it to
  extract more value. This was without clearly understanding the intrinsic value of the asset and its
  strong dynamic.
- Dolutegravir has become the best-in-class integrase inhibitor and is now part of several HIV treatment guidelines. In just a few years, it has become one of the biggest drugs for HIV by sales when Tivicay and Triumeq are combined. And two other fixed-dose combinations are currently in late-stage development (with rilpivirine in collaboration with Janssen and 3TC), which should further expand the dolutegravir-based portfolio.
- But the quality of ViiV's pipeline is not limited to new FDC with dolutegravir but it also includes an
  interesting long-acting integrase inhibitor for maintenance therapy and/or prophylaxis, as well as
  two innovative compounds acquired from BMS.
- So, in the end, we see ViiV Healthcare surging from slightly more than USD3bn in sales in 2015 to close to USD6bn in 2022, i.e. from less than 10% to 14% of group's total sales. Considering that ViiV Healthcare has a core EBIT margin of around 70%, i.e. well above average (although it excludes royalty payments to Shionogi), high growth at the top-line level (8.8% on average by 2022) will also impact margins and the bottom-line. We have also calculated that GSK's stake in ViiV Healthcare could be valued by DCF at around 430 pence per share or a quarter of our FV while it represents much less of the group's sales or profits. We will try to do the same calculation with CHC and vaccines to see how much the pharmaceutical part left is worth, by difference.

#### VALUATION

We are introducing for the first time the risk-adjusted pipeline of ViiV (USD870m in 2022 in total which are well balanced between DTG/rilpivirine, DTG/3TC and the two former BMS drugs while we are more cautious for the time being with cabotegravir) to our sales forecasts. Note that we have probability-adjusted our numbers using PoS between 30% and 55% although most of the projects are already in phase III trials and sometimes include existing products that are "just" combined. Our FV goes up by GBp40 to GBp1,740.

# Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

#### Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a		
Der	recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of		
	elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock		
	will feature an introduction outlining the key reasons behind the opinion.		

NEUTRAL Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.

SELL Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
