Q2 2016 conference call feedback: growth momentum becoming more positive

Fair Value EUR14 vs. EUR13 (+9%)

BUY vs. NEUTRAL

We upgrade our rating to Buy from Neutral and raise our DCF-derived fair value to EUR14 from EUR13 as we increase our medium-term lfl revenue growth rate to 7% from 6%. As for Alten, Altran sees growth momentum becoming increasingly solid, beyond the calendar effect in our view. Net staff hiring is accelerating, reflecting stronger demand for High-tech consulting services.

ANALYSIS

31/12/15

- Still targeting flat revenues in Germany for 2016. Management admits that Germany, at +0.1% Ifl in Q2, was not exactly at the level it initially expected (+8%). In fact, the +0.1% reported for Q2 (-5.1% restated from calendar effects) was negatively impacted by the shutdown of a low added-value training business (EUR2-3m revenues) and the subcontracting of some contracts in Spain due to the lack of local resources in Germany (EUR2-3m revenues). That said, management remains still expects it to be flattish for the full year, which implies 5% growth restated for the calendar effect. This lack of resources is concentrated in Automotive, while other industries are growing. Hiring is in progress in Germany (+100 staff) while restructuring should be broadly complete in H2. Small acquisitions are planned to rebuild capacity and accelerate the ability to provide resources to customers, as the pipeline is growing. The invoicing rate in Germany remains below target, but is progressing (+3ppt over Q2, +2ppt over H1).
- Performance by geography in Q2. On a lfl basis, France was up 10.6% (+5.9% ex-calendar effects), Germany up 0.1%, Benelux up 1% (still impacted by the historical business in the Netherlands and Banking in Belgium), the UK up 11.9%, Scandinavia up 14.7%, Switzerland up 26.3%, Italy up 6.9%, Iberia up 19.5% (benefiting from the business subcontracted from Germany), the US up 4.7% (less revenues on the historical business in Energy), India up 31.2% and China up 22.1%. In France, almost all the industries are growing (except Telecoms which remains tough), and growth was above 20% in Automotive, Civil aviation, Space and Life Sciences, while Banking grew by a high single-digit, and Energy was up almost +5%. Finally, revenues with Airbus were up 10%.
- Update on hirings and World Class Centres. The 459 net staff hirings in Q2 were purely organic, o/w half of them in France the rest spread between Spain, Morocco and India. The pace of recruitment will remain aggressive, which puts some pressure on the invoicing rate without pushing it down. H2 hiring activity is expected to be as dynamic as in H1. World Class Centres are now 5, and 8 are planned by the end of this year. Of the 5 that are up and running, 3 are working well and 2 have been reworked. Of the 4,000 staff based in low-cost countries, 2,000 are based in India, 800 in Eastern Europe, 1,000 in Morocco, and 300 in Portugal.

VALUATION

7.6x

- Altran's shares are trading at est. 11.2x 2016 and 9.3x 2017 EV/EBIT multiples.
- Net debt on 31st December 2015 was EUR138.3m (net gearing: 19%).

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

BUY

Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.

NEUTRAL

Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.

SELL

Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
