FMC's results were in line with expectations for the top line (7% CC growth) and outperformed profitability forecasts (EBIT at 14.5% of sales, 40bp ahead of consensus and net income at USD294m, 4% ahead of consensus). North America (72% of sales) drove the the performance top to bottom line, with sales in the region benefitting from 1/ increased DSO and 2/ revenues per tx while EBIT was boosted by 1/ higher volumes and 2/ lower cost per tx. FY guidance reiterated.

Source : Company Data; Vara Research.

ANALYSIS

- Fresenius MC has released H1 sales in line with estimates at USD4.42bn, up 7% CC (5% reported) driven by a strong 8% CC increase in HC services revenues (7% reported). Dialysis product sales were weaker (affected by a demanding comparison basis in 2015) and grew 2% CC (-0.5% reported). US revenues which account for 72% of the group's turnover rose 7.5% CC (7.5% reported). Dialysis revenues benefited from 1/ three more days of sales (54 DSO vs 51 in Q2 2015) increases 5.3% at CC (5.3%reported) and 2/ an increase in revenue par treatment (up 1.7% to USD352). US organic growth mainly benefitted from further positive trends in Care Coordination. Care Coordination revenues increased 21% CC (21% reported). EMEA sales were mixed. The 3% CC growth was positively impacted by Dialysis treatments up 9.4% CC on the back of a 4% CC drop in product revenues. Note that 7pp of EMEA's Dialysis revenue increase stemmed from acquisitions. APAC revenue grew 6% CC (5% reported) driven by dialysis products. Note that the company intensified its marketing activities, which started to pay in China notably. FMC recorded an 8.6%CC growth in LatAm totally offset by FX impact (-14% reported). Following the divestment of clinics in Venezuela, Dialysis treatments decreased 7% in the region.
- From a profitability standpoint, EBIT stood at USD641m or 14.5% of sales, 2% ahead of expectations. Again, the US region came as a support with operating income up 20% to USD513m or 16.2% of sales (14.5% in Q2 2015). The latter benefitted from 1/ a decline in cost per treatment (USD282 vs USD286 YoY) with 80% of patients now switched to Roche's Mircera and 2/ higher volumes with commercial payors. We would note that high cost of hospitalist and intensivist services in the Care Coordination business weighed on margins in the division, which were down 350bp to 4.4%. Net income increased 22% (within the company's guidance range) and 4% ahead of expectations while EPS stood at USD0.96/share, also 4% ahead of consensus numbers.
- All FY2016 guidance has been reiterated. Revenues are expected to increase in the 7-10% range at CC while an increase in operating income higher than revenues is expected to drive a 15-20% increase in net income.

VALUATION

- We reiterate our BUY recommendation and EUR94 Fair Value.

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
NEUTRAL	Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
SELL	Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
