UCB reported 9M revenues slightly ahead of CSS estimates. CVN sales are up 18% y-o-y to EUR1,735bn, in line with consensus expectations of EUR1.727bn. Gap in between Briviact estimates and reported sales comes from the delayed period in between FDA approval (Feb. 2016) and DEA classification in Q2. FY2016 Revenue adjusted towards the upper range of the EUR4-4.1bn guidance. With CSS already above this range, we do not anticipate any major upward revision in estimates.

ANALYSIS

- Cimzia grew 21% CER** over the first nine months of the year to EUR933m (30% of total group sales). US and European sales continues to growth steadily (15% and 24% CER respectively), in line with past quarters performance. We believe that the trend should be maintained at least in Europe where the EMA approved the prefilled pen which features a certain ease of use. **In Japan, sales are up to EUR25m from EUR5m reflecting a normalisation in order pattern. Vimpat sales are up 19% CER** (19% of total group sales) to EUR583m. Available since August in Japan in partial onset seizures, EUR3m of sales have been derived from the country. **Neupro sales grew 11% CER to EUR219m** (7% of total group sales), boosted by an acceleration in Europe. **All in all, CVN sales are up 18% y-o-y to EUR1,735bn, in line with consensus expectations of EUR1.727bn.** Briviact, approved at the beginning of the year (Feb 2016) as an adjunctive therapy in the treatment of partial onset seizure reported sales for the first 9M of EUR11m while consensus was expecting EUR18. Followig approval in Europe in January, main reason comes from the **delayed period in between FDA approval (Feb. 2016) and DEA classification** (+/- 90 days after) which enabled UCB to effectively launch its product in the US by mid-year (only one quarter of sales). We would highlight the good resilience of Keppra sales over the third quarter which enables the group to report 9M revenues of EUR3.075bn, growing 7% CER, slightly above CSS estimates at EUR3.026bn.
- On the back of these results, Revenue guidance for the year is now expected in the upper range of the EUR4-4.1bn range. We believe that this adjustment, which was largely anticipated by CSS is not likely to trigger any major revision in estimates.
- R&D developments in Q3 includes FDA's BLA acceptance for romosozumab (FRAME study results). Note that PDUFA action date has been set on July 17th, 2017. Initiation of phase IIb for bimekizumab in psoriasis and that in the same indication, Cimzia is evaluated in three phase III out of which one has reported results. Dermira is financing the trials.

VALUATION

- We reiterate our NEUTRAL rating and EUR80 fair value

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
NEUTRAL	Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
SELL	Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
