ANALYSIS

- EDF unveiled its **9M 2016 revenues** yesterday evening. Revenues amounted to **EUR51,966m** down **3.1%** yoy on an organic basis but **1.3%** above consensus expectations. Q3 2016 revenues therefore reach **EUR15,307m** and rose slightly yoy on an organic basis at **0.6%**. 9M 2016 revenues in France were up **0.4%** on an organic basis, notably thanks to the **positive effect of the 2014 tariff adjustment (EUR1bn positive impact)**. Excluding this adjustment, 9M group and French revenues were down **5.0%** and **3.1%** yoy, respectively, on an organic basis. The **Italian** (-5.8% on an organic basis) and the **UK** (-10.4% on an organic basis) divisions bore the brunt of the unfavorable market environment, with **low prices**, over the first nine months of the year.
- Note that French nuclear output amounted to **287.1TWh** over the period, down **19.2TWh** (or 6.3%) vs. 9M-15 mainly due to the additional controls needed, notably on steam generators. As a reminder, last week, the full-year **nuclear output target was revised downward from 380-390TWh to 378-385TWh**. The 2017 nuclear output target, at 390-400TWh, remained unchanged.
- The group reiterated its full-year guidance for 2016** with the aim of reaching EBITDA of between **EUR16.0bn** and **EUR16.3bn**. Net financial debt/EBITDA is still expected to be between 2x and 2.5x and the payout ratio (excluding non-recurring items) is expected between 55% and 65%. EDF also confirmed its target for **positive cash flow in 2018** (after dividends, excluding Linky, new developments and assets disposals maintained). Finally, the group also confirmed its **capital increase** schedule with the aim of launching it before the end of Q1 2017.
- EDF also discussed the proposal by the French Regulatory Commission of Energy (CRE) aimed at **tightening rules related to the ARENH mechanism**. The proposal would tighten current conditions related to the termination clause, which allows suppliers a late power of arbitration which is said not to be consistent with the principle of annuality of the mechanism. **This change would be positive for the group as it would help curb potential speculation in the French power market where forward prices have reached their highest level since the end of 2012.**
- No change to Buy recommendation and FV of EUR14.60.**

VALUATION

- At the current share price, the stock is trading at **5.3x** its 2016e EV/EBITDA multiple
- Buy, FV @ EUR14.6**

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

BUY	Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
NEUTRAL	Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
SELL	Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation.
