ANALYSIS

- Polish utility Enea revealed on Friday evening that it has obtained the **exclusive rights from Engie to conduct further negotiations** regarding the acquisition of 100% of shares from Engie in Engie Energia Polska, which owns the c. **1.9GW Polaniec power plant**. The exclusive rights granted to Enea will be valid until the end of 2016.
- No financial details have been unveiled** by Enea. However, it has been previously reported in the press that **Enea's bid could amount to about EUR220m**. This was said not to be the highest bid received, as a Chinese consortium proposed about **EUR400m** for these assets. However, **the Polish government is stepping up efforts to sell local assets to Enea** arguing that the Polish utility, owned by the State, will ensure energy security within the country.
- Despite the **tepid implied valuation** (we estimated Poland assets' EBITDA to amount to c. **EUR50m**), we view this new potential sale as **positive for Engie** as it confirms that **the company is successfully delivering its EUR15bn disposals programme** (more than EUR6bn have already been completed or about to be completed). Earlier this month, Isabelle Kocher, CEO of Engie, revealed that **the company was expecting to completed its disposals plan ahead of its end-2018 deadline**.

VALUATION

- Buy, FV @ EUR15.6**
- At current share price, the stock is trading at **6.2x** its 2016e EV/EBITDA multiple

NEXT CATALYSTS

- Further disposals** including notably the E&P assets, the remaining thermal assets in Australia (Loy Yang B and Kwinana power plants) or the port project in northern Chile and the IEM2 power plant, still in Chile.
- Update on nuclear provisions** which could occur by the end of the year. As a reminder, a 100bps decrease in the discount rate would imply a c. EUR1.1bn increase in provisions – hence an EURO.5 per share negative impact on our FV – and a c. EUR100m headwind at the pre-tax income level (linked with higher dismantling provisions).
- March 2nd 2017**: FY-16 results

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

- BUY** Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
- NEUTRAL** Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
- SELL** Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
