EIFFAGE (BUY - Top Picks, FV EUR107) | Further expansion of the concessions' portfolio

- Eiffage announced yesterday the acquisition of nine micro-hydroelectric power stations in South-West of France. Transaction price has not been disclosed. The deal includes the renovation of the stations to make them standards-compliant and increase their power to 6MW, as well as the construction of a new power station. Eiffage will be in charge of the operation and maintenance of these 10 stations.
- The works, carried out by Eiffage Energies Systèmes as the lead company along with Eiffage Génie Civil (the civil works arms of Eiffage), will last three years and are estimated at EUR25m.
- Another example of the ability and will of Eiffage to strengthen its concessions' portfolio. This is a key issue for the group as the value of APRR - the main asset of the group valued at around EUR10bn (for 100% but Eiffage got 50%) or half of our SOTP and Fair Value - is expected to decline as soon as next year, according to our calculations.

Bryan Garnier stock rating system

For the purposes of this Report, the Bryan Garnier stock rating system is defined as follows:

Stock rating

- BUY** Positive opinion for a stock where we expect a favourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential upside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
- NEUTRAL** Opinion recommending not to trade in a stock short-term, neither as a BUYER or a SELLER, due to a specific set of factors. This view is intended to be temporary. It may reflect different situations, but in particular those where a fair value shows no significant potential or where an upcoming binary event constitutes a high-risk that is difficult to quantify. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
- SELL** Negative opinion for a stock where we expect an unfavourable performance in absolute terms over a period of 6 months from the publication of a recommendation. This opinion is based not only on the FV (the potential downside based on valuation), but also takes into account a number of elements that could include a SWOT analysis, momentum, technical aspects or the sector backdrop. Every subsequent published update on the stock will feature an introduction outlining the key reasons behind the opinion.
